

# STAINLESS STEEL P R E S S

There are a number of possible ways to join tubes and accessories in plumbing installations, including threading, soldering and welding, but no method makes a secure connection as quickly or as easily as pressing.

- **Installation is QUICK and SAFE.**  
Job times and safety risks are at a minimum.
- **LESS LABOR is needed.**  
Time, training, and overhead are greatly reduced.
- **EASY to handle.**  
Press fittings and a press tool with appropriate attachments are all that is required on the jobsite.
- **NO ANTI-FIRE measures are needed.**  
No need to obtain an open flame permit.  
Jobsite safety is improved.
- **Resistant to CORROSION.**  
Isotubi-USA products are made of ASTM AISI 316/316L stainless steel for superior corrosion resistance.
